

THE CITY OF DURHAM TRUST

Question 18

Should we have a higher or lower threshold for impact assessment than the default threshold of 2,500sqm in Government guidance?

The City of Durham Trust's area of operation is that of the former City of Durham District. We agree that the default threshold of 2,500m² would be appropriate here.

Should submissions be received suggesting a different threshold elsewhere in the County the above answer should not be construed as opposing them.
